MINOR MODIFICATION TO PENDING APPLICATION
KSNA LARAMIE, WYOMING (ID 9761)
ATHOMIC BROADCASTING, INC.
FILE NO. BPH-20001220ABO

This minor amendment is being filed in response to a letter received by the commission (see attached) in regards to a discrepancy in the geographic coordinates of the proposed transmitter site for KSNA.

The original application listed the transmitter coordinates of 41° - 18' - 39" N.L. and 105° - 27' - 14" W.L.. These coordinates were a typographical error, as they should have been 41° - 18' - 39" N.L. and 105° - 27' - 12" W.L. as per the tower registration (1009525) and the other co-located station KRQU(FM).

The corrected coordinates listed in Section III-B, question number 3. A new page 12 of FCC form 301 is attached with the corrected coordinates.
