

MINOR CHANGE/ONE-STEP APPLICATION
CUMULUS LICENSING LLC
KENG (FM) RADIO STATION
CH 267C3 - 101.3 MHZ - 3.2 KW
PARACHUTE, COLORADO
March 2008

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), permittee of KENG, Channel 266A, Parachute, Colorado.¹ Cumulus herein proposes to upgrade KENG by changing to Channel 267C3 at Parachute and relocating the station to a new location.²

Cumulus is proposing to implement this change at a new tower site. As the proposed tower is only 200 feet above ground, the Federal Aviation Administration was not apprised of this proposal. Further, no tower registration is necessary.³ At the proposed site, Channel 267C3 does not meet the Commission's minimum distance separation requirements to one other station. Therefore, an allocation site has been selected that meets the Commission's minimum distance separation requirements, provides a 70 dBu over the community of license, and is suitable for tower construction, as indicated in Exhibit A. Since the implementation site does not meet §73.207, processing pursuant to §73.215 is requested (Exhibit B).

-
- 1) Cumulus is operating KENG with the facilities authorized in BMPH-20080102ACI. A license to cover the permit has been filed.
 - 2) The facilities requested are those previously authorized in BMPH-20070119ADH.
 - 3) Based on the Commission's TOWAIR program, the proposed tower meets the required slope test to all nearby airports. As such, no tower registration appears necessary.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Cumulus and is available to the Commission upon request.⁴

4) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All other necessary reviews have been, or will be, addressed by the applicant. Should any analysis indicate there are environmental issues, the issues will be addressed and the ultimate findings reported to the Commission before any tower construction is undertaken.
