Notice of Parameters for Operation under Pre-Sunrise Authority (PSRA)
July 24, 2024

(Post this letter with your current authorization)

Pursuant to Section 73.99 of FCC Rules and Regulations, Pre-Sunrise operation (PSRA) is permitted in accordance with the parameters listed below. The powers listed below are maximum values that may not be exceeded. However, operation at any power not in excess of those listed is permissible. While the powers listed below are calculated at 15-minute time intervals, the station is not required to change its power at every time interval, so long as operation at any time is at or below the maximum power for that time period.

Calculations Based On

KLDC - BL-20220921AAD 27 Sep 2022		Antenna System: Day Lat: 39-39-29.00 N Lon: 105-0-50.90 W Reference Power: 1.000 kW Theoretical RMS: 305.28
DENVER, CO		
1220 kHz (AM) Class D	Granted License	
FID 12364 | Application

Constraining Stations

XEB1 - 14 Nov 2019		**CJOC - 14 Nov 2019**	
SAN LORENZO TEZONCO, DF MX		LETHBRIDGE, AB CA	
1220 kHz (AM) Class A	Granted License	1220 kHz (AM) Class B	Granted License
FID 114266 | Application		FID 102766 | Application	

Notes

- Operation not Permitted
* Daytime Authorized Operation
** In MARCH follow April values once Advanced Time begins
*** In NOVEMBER follow October values until Advanced Time ends
In lieu of operation under PSRA, a station may continue Nighttime Operation, if authorized.

End Page 1 of 2 PSRA

Status of Previous Pre-Sunrise Authority

This notice and its parameters supersede any previous Pre-Sunrise authority. If these parameters are lower than those previously authorized, the power must be reduced within 30 days of receipt of this letter or PSRA must be terminated. PSRA operation may be resumed on completion of the reduction.

Calculation of Antenna Input Power

The nominal power listed is not necessarily the same as the Antenna Input Power. To determine the Antenna Input Power permitted during PSRA; multiply the INPUT POWER listed on the station authorization by the ratio of the PERMISSIBLE POWER to the REFERENCE POWER. The Antenna Current or Common Point Current permitted during PSRA is obtained by multiplying the square root of that same ratio by the AUTHORIZED ANTENNA CURRENT or COMMON POINT CURRENT.

Nature of Authority Granted

PSRA is secondary to the basic instrument of authorization with which it is to be associated. The PSRA may be suspended, modified, or withdrawn by the FCC without prior notice or right to hearing, if necessary to resolve interference conflicts, to implement agreements with foreign governments, or in other circumstances warranting such action. Moreover, the PSRA does not extend beyond the term of the basic authorization.

Notification Procedure

PSRA operation under this authorization may commence immediately upon receipt of this Notice. The licensee shall place this Notice of Parameters for Operation under Pre-Sunrise Authority (PSRA) into the FCC Authorizations folder of the station's Online Public Inspection File (OPIF). *See* 47 CFR §73.3526(e)(1).

For Additional Information

If there are any questions concerning PSRA operation please call:

Audio Division, Media Bureau: (202) 418-2700

Notice of Parameters for Operation under Post-Sunset Authority (PSSA)
July 24, 2024

(Post this letter with your current authorization)

Pursuant to Section 73.99 of FCC Rules and Regulations, Post-Sunset operation (PSSA) is permitted in accordance with the parameters listed below. The powers listed below are maximum values that may not be exceeded. However, operation at any power not in excess of those listed is permissible. While the powers listed below are calculated at 15-minute time intervals, the station is not required to change its power at every time interval, so long as operation at any time is at or below the maximum power for that time period.

Calculations Based On

KLDC - BL-20220921AAD 27 Sep 2022		Antenna System: Day Lat: 39-39-29.00 N Lon: 105-0-50.90 W Reference Power: 1.000 kW Theoretical RMS: 305.28
