Attention: Charles N. Miller, P.E.
Reference: AM Broadcast Station KMXA, Facility ID #10057

Ladies & Gentlemen:

This letter is written to provide engineering support for an application for Special Temporary Authority for KMXA.

KMXA operates with separate directional antenna patterns for day and night operation. In the process of collecting necessary data for preparation of an application for license using a method of moments proof of performance, it has been determined that the station's phasor and antenna tuning units will require significant modification, including replacement of old, non-adjustable components as well as substantial circuitry changes.

Therefore the licensee of KMXA, Entravision Holdings, LLC, requests special temporary authority for operation of the day and night antenna systems with parameters at variance for a period of six months to accomplish the necessary changes and to perform the necessary measurements and analysis to complete a moment method proof of performance and prepare the appropriate license application.

Should there be any questions with regard to this matter, please advise the undersigned or licensee's legal counsel, Barry Friedman, Esq.

Sincerely,

Benj. F. Dawson III, P.E.
BFD/bhs
